

# Streamer

Courses management and access for Students

# Overview

Platform is designed to grant access from student to a large choice of asynchronous courses.

Conceptors can build their own courses, update it. Conceptors should access to all medias from the repository to build a new course. They can change order of modules and medias inside a module. They can't remove a media if they are not the owner of this media, naturally, cannot remove media used in some modules.

Manager can affect some Student to some courses and view progressions, stats,

As Student, i can access to all affected courses, read, view medias and validate each modules with a test

# Commons

Common US

# Authentication

As a User, i have to fill a login form to access to my dashboard

As a User, i have to click on a “forgotten password” link to get back at new password

As a User, i can check a box to stay authenticated even if i close the app

As a User,after successfully authentication, i shouldn't go back to login form

As a User, i have to click on a logout button to get back to login form

# IHM - UX

As a User, i should see an action on the Header bar to disconnect of the app

As a User, i should see app version number on the footer bar

As User, i should go back to my dashboard as i click on the app title in the Header bar

As User, i should see the feature title in the Header toolbar

# Conceptor centric

US as Conceptor user

# Course

As a Conceptor i should have access to Course, Modules and Medias to manage my own

As a conceptor, i should have to create a Course to feed the platform

As a Conceptor, i should see courses from other conceptors to build my own

As Conceptor, i should be abble to “copy” a course to build my own

As Conceptor, i should copy one or more modules to feed my course

As Conceptor, i should change status of a course to publish or unpublish it

# Module

As a Conceptor, i  
should see  
modules from  
other conceptors  
to build my own  
course

As Conceptor, i  
should reorder,  
move my Modules

As Conceptor, i  
should create  
modules to add it  
in a course

As Conceptor,i  
should update my  
own modules

# Media

As a Conceptor, i  
should see all  
medias to feed my  
own module

As Conceptor, i  
should reorder,  
move my media in  
a module

As Conceptor, i  
should create  
media to add it in  
a course

As Conceptor,i  
should update my  
own media
